Important: Your credit card will NOT be charged when you start your free trial or if you cancel during the trial period. If you're happy with Amazon Prime, do nothing. At the end of the free trial, your membership will automatically upgrade to a monthly membership.

ROG Thor 1000W Platinum II is designed to power the best high-end gaming PCs. ROG heatsinks cover critical components to deliver lower temperatures and reduce noise. The large OLED display monitors power draw in real time. This is the perfect pairing with powerful ROG motherboards and graphics cards.

To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzed reviews to verify trustworthiness.

"...power supply is the backbone of my high-performance PC setup, efficiently powering my ASUS ROG Maximus Z790 Formula motherboard, ASUS ROG Ryujin III..." Read more
