I put the battery in my 2006 Prius and it appears to be working fine.Voltage usually around 13.1 to 13.3 Volts according to display monitor in test mode, Car boots/starts right up and cars charger appears to work normally.All and All, Great battery.

This is now my second lithium battery purchase from Weize. I own quite a few motorcycles and will eventually get as many as I can using their batteries. They are cheaper cost wise, have over double the CCA and weigh a fraction of AGM, lead acid and or GEL. I expect them too to last 4x longer. THANK YOU WEIZE ! Start making more motorcycle sizes please !

Great battery for the money. Battery tester shows results up to spec. Low resistance and cracking test voltage drops to 12. Fast shipping and battery packed well. Overall happy with purchase!

Quick ship & perfect fit in my trusty old 2005 Suzuki Grand Vitara. Arrived fully charged. Price was much better than any local competitor. Only time will tell how long this will last, hopefully similar to others I've had in this car which averaged over 6 years.
