

12 volt wind turbine generator

12 volt wind turbine generator

Our windmill turbine adopts a three-phase synchronous motor with a high-performance NdFeB permanent magnet. The external MPPT controller and Teflon copper wire feature overheating protection. Meanwhile, the outer shell is designed for fast heat dissipation, provides you with long-term use.

The longer the turbine blade is, the more power it produces. The blade is made of nylon fiber, 47in/120 cm in rotor diameter. Nylon material features waterproof, corrosion-proof, and lightweight. In addition, the working temperature is -40?~80?, so you do not need to worry about using it under bad weather.

Our wind power generator features hoop installation, double side blade design, and accurate hub & blade groove. This upgraded wind turbine provides you convenient and fast assembly, avoiding the wrong installation of flange type, saving more effort and time for you.

The windmill generator can start at a wind speed of 2 m/s, survive at 45 m/s. The blade features a yaw adjustment system. It can automatically adjust direction to capture the maximum wind energy. Also, with a double ball bearing design, the turbine will have low vibration when the blade is rotating.

This home wind turbine is combined with a die-casting aluminum body and a stainless steel tail. The features are casting shape in one, high intensity. In addition, the surface of the turbine is finished with baking varnish, which features corrosion-proof, waterproof, and durable for a long lifespan.

The small wind turbine generator kit can produce energy to meet your various charging requirements. Meanwhile, it is convenient to install and maintain, perfectly suitable for charging needs of home monitoring, motor home, boats, gazebos, chalets, marine, etc.

To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzed reviews to verify trustworthiness.

FREE Delivery is available to Prime members. To join, select "Try Amazon Prime and start saving today with FREE Delivery" below the Add to Cart button and confirm your Prime free trial.

Important: Your credit card will NOT be charged when you start your free trial or if you cancel during the trial period. If you're happy with Amazon Prime, do nothing. At the end of the free trial, your membership will automatically upgrade to a monthly membership.

This item has been tested to certify it can ship safely in its original box or bag to avoid unnecessary packaging. Since 2015, we have reduced the weight of outbound packaging per shipment by 41% on average, that's over

12 volt wind turbine generator

2 million tons of packaging material.

1.The wind turbine is made entirely of high quality aluminum and stainless steel fittings. It is not only lightweight, small in size, but also compact in shape.

3.The surface of the wind turbine is coated with a special process that provides excellent resistance to oxidation and corrosion under any harsh conditions, as well as excellent corrosion resistance, water resistance and sand resistance.
