

# 16 kWh battery energy storage

## 16 kWh battery energy storage

Read the entire INSTALLATION AND USER'S MANUAL document before installing or using the battery. Failure to do so or to follow any of the instructions or warnings can result in electrical shock, serious injury, or death, or can damage the battery, potentially rendering it inoperable.

Connect this solar kit with Enphase Energy microinverters to the grid for an easy home battery backup solution or install it as a fully independent system to deliver power to remote off-grid locations.

The Enphase Ensemble inverter and battery technology works in any solar application (grid-tie, off-grid, or battery backup systems). Plus, it can automatically detect connection to the grid and switch between on-grid and off-grid applications seamlessly.

This pre-designed 16.0 kW solar kit contains the core components you need to go solar on your terms. Whether you assemble and install your solar panels yourself or hire a local contractor to assemble your system, GoGreenSolar's kits give enterprising DIYers a way to save money on their solar project vs. outsourcing it to a turnkey solar provider.

With South-facing exposure, this kit will produce 17,500 - 27,500 kWh per year. It can deliver 11.52 kW of instantaneous power with no sun and up to 23.12 kW of instantaneous power in full sunlight.
