

160 kWh lg chemical energy storage

160 kWh lg chemical energy storage

Both the LG ESS RESU batteries and the LG Home 8 are good batteries from a well-known brand. If your installer is offering them exclusively and you feel that the price is right, they are fine choices.

That being said, we don't think that either of these batteries is among the best solar batteries on the market. Our top picks include the Enphase IQ 5P, the Tesla Powerwall 3, and the Panasonic Evervolt.

The RESU Prime line of batteries is older and offered by LG Energy Solution, a subsidiary of LG Chem, which also makes battery cells for carmakers like Toyota, GM, Ford, and Volkswagen. RESU Prime batteries are very affordable and best for a new solar+storage installation because they have to be connected to a hybrid inverter to work.

The LG Home 8 battery is newer and offered directly by LG Electronics, the same company that makes consumer electronics and appliances. Because it is connected to a home's AC power system, the Home 8 is better for people who already have solar panels but want to add battery storage. However, the Home 8 is much more expensive than the RESU Prime line.
