

20 2 kwh generac pwrcell energy storage system

20 2 kwh generac pwrcell energy storage system

Adding a Generac home standby generator up to 26 kW provides virtually endless* backup capabilities, giving you the ultimate peace of mind. An integrated generator will automatically kick on to power the home during an outage when battery levels get low, giving the battery time to recharge and eventually switch back.

An ecobee thermostat integrates seamlessly with PWRcell 2 to monitor outages and automatically adjust temperature set points to preserve stored energy. It also provides a convenient in-home display for anyone in the home to view outage details and battery status in real time.

Easily monitor energy consumption and solar production, battery use and savings over time right from your phone. Plus, when you toggle on Outage Guard*, your system will automatically shift energy to fill your PWRcell batteries to ensure you'll have maximum backup power when storms and outages are likely in your area.

PWRcell 2 is currently available in select markets only. Answer a few questions so we can see if PWRcell 2 is available in your area and connect you with an independent installer who can provide a custom quote.

As subject matter experts, we provide only objective information. We design every article to provide you with deeply-researched, factual, useful information so that you can make informed home electrification and financial decisions. We have:

Incorporated third-party data and information from primary sources, government agencies, educational institutions, peer-reviewed research, or well-researched nonprofit organizations.

We won't charge you anything to get quotes through our marketplace. Instead, installers and other service providers pay us a small fee to participate after we vet them for reliability and suitability. To learn more, read about how we make money, our Dispute Resolution Service, and our Editorial Guidelines.

In 2019, Generac acquired battery manufacturer Pika Energy and has since integrated their technology into the launch of their own Generac-branded home storage solution: the Generac PWRcell. Having long been a leader in the backup power space, Generac is now moving into clean energy and energy storage, with the PWRcell line of batteries at the forefront of their new product fleet.

20 2 kwh generac pwrcell energy storage system

A qualified EnergySage-approved installer can give you the best information about the Generac home battery system and other energy storage options available to homeowners today.

The Generac PWRcell pairs well with solar panel systems, especially if your utility has reduced or removed net metering, introduced time-of-use rates, or instituted demand charges. Installing a storage solution like the Generac PWRcell with a solar energy system allows you to maintain a sustained power supply during the day or night as long as you store enough power from your solar panels when the sun is shining.

As with many other home battery products, the Generac PWRcell is sized for day-to-day use at your home and is primarily designed to be paired with a solar panel system. When your solar panels produce more electricity than you can use in your home, you can store the excess electricity in the battery system instead of sending it back into the grid. Later, when your panels aren't producing enough electricity to meet your home's needs, you can use the stored energy in your battery instead of having to buy it from your utility company.
