

200 kWh off-grid energy storage

200 kWh off-grid energy storage

The C&I ESS Battery System is a standard solar energy storage system designed by BSLBATT with multiple capacity options of 200kWh / 215kWh / 225kWh / 245kWh to meet energy needs such as peak shifting, energy back-up, demand response, and increased PV ownership.

BSLBATT Commercial solar battery system boasts outstanding performance, making it versatile for applications in farms, livestock, hotels, schools, warehouses, communities, and solar parks. It supports grid-tied, off-grid, and hybrid solar systems, can be used with diesel generators. This commercial energy storage system comes in multiple capacity options: 200kWh / 215kWh / 225kWh / 241kWh.

The BSLBATT 200kWh Battery Cabinet utilizes a design that separates the battery pack from the electrical unit, increasing the safety of the cabinet for energy storage batteries.

BSLBATT C& I ESS Battery has the world's leading battery management technology, including dual integration of active and passive fire protection, and the product setup has PACK level fire protection, group level fire protection, and dual-compartment level fire protection.

Integration of all energy storage system components, the output of which can be directly connected to the utility and photovoltaic systems. Multiple cabinets can be connected in parallel to realize the expansion of the energy storage system.

The display is able to present the instant status of each module in a stereoscopic three-dimensional way, providing an intuitive and interactive monitoring experience.

The local control screen enables diverse functions, including system operation monitoring, energy management strategy formulation, remote device upgrades, and more.
