

230 kWh battery energy storage solution

230 kWh battery energy storage solution

The 100kW/230kWh liquid cooling energy storage system was independently designed and developed by EVB. It is widely used in the energy storage field with grid-tied and off-grid inverters.

The 100kW/230kWh liquid cooling energy storage system adopts an "All-In-One" design concept, with ultra-high integration that combines energy storage batteries, BMS (Battery Management System), PCS (Power Conversion System), fire protection, air conditioning, energy management, and more into a single unit, making it adaptable to various scenarios.

It is suitable for industrial and commercial situations with high requirements for grid continuity and can cover communication energy storage, grid frequency modulation energy storage, wind and solar micro-grid energy storage, large-scale industrial and commercial distributed energy storage, data center energy storage, and photovoltaic power generation business in the new energy field.

EVB offers a range of charging stations covering various power capacities, seamlessly compatible with energy storage products, and suitable for diverse environments such as commercial areas, residential communities, or remote locations.

Industrial and commercial enterprises, data centers, industrial parks, commercial buildings, large industries, mobile device energy storage, power quality management, etc.

The 100kW/230 kWh air cooling energy storage system was independently designed and developed by BENY. Widely used in the energy storage field with grid-tied inverters, and off-grid inverters.

The 100kW/230kWh air cooling energy storage system cabinet adopts an "All-In-One" design concept, with ultra-high integration that combines energy storage batteries, BMS (Battery Management System), PCS (Power Conversion System), fire protection, air conditioning, energy management, and more into a single unit, making it adaptable to various scenarios.
