

3 75 kva solar inverter

3 75 kva solar inverter

Luminous Solar Hybrid Combo, a comprehensive solution that meets your energy needs with unparalleled efficiency. This combo includes a hybrid inverter TX 3.75 KVA, four solar batteries of 150 AH each, and four solar panels of 550 W each, designed to offer optimal energy output and reliability.

OXO Trade Links is proud to introduce the Luminous Solar Hybrid Combo, a comprehensive solution that meets your energy needs with unparalleled efficiency. This combo includes a hybrid inverter TX 3.75 KVA, four solar batteries of 150 AH each, and four solar panels of 550 W each, designed to offer optimal energy output and reliability.

The hybrid inverter TX 3.75 KVA is a cornerstone of the Luminous Solar Hybrid Combo. It is engineered to seamlessly integrate solar power with the grid, ensuring consistent energy supply even during power outages. This inverter is highly efficient, transforming solar energy into usable electricity with minimal loss.

Included in the combo are four solar batteries, each with a capacity of 150 AH. These batteries are designed to store substantial amounts of energy, ensuring that you have a reliable power source during nighttime or cloudy days. The high storage capacity also reduces dependence on the grid, contributing to more sustainable energy consumption.

The Luminous Solar Hybrid Combo features four solar panels, each rated at 550 W. These high-efficiency panels capture maximum sunlight, converting it into electrical energy with exceptional efficiency. The robust design ensures durability and consistent performance over time, making them a long-term investment in renewable energy.

In summary, the OXO Trade Links's Luminous Solar Hybrid Combo offers a reliable, efficient, and sustainable energy solution. With its advanced hybrid inverter, high-capacity solar batteries, and powerful solar panels, this combo is designed to meet diverse energy needs while promoting environmental sustainability. Invest in this comprehensive solution to experience uninterrupted power and contribute to a greener future.
