

# 350 kWh industrial energy storage battery

## 350 kWh industrial energy storage battery

The new EScal HV offers installations of between 17 kWh and 350 kWh using a stackable system that allows up to 15 modules to be placed in series, and four strings in parallel.

Spanish energy storage specialist Cegasa presented EScal HV, its new modular and scalable battery, at Intersolar. The company claims that the new solution will respond to an unmet demand for high-voltage systems at an industrial and commercial level.

The new system offers installations of between 17 kWh and 350 kWh using a stackable system that allows up to 15 modules to be placed in series, and four strings in parallel.

Introducing the PROLIANCE Intelligent Battery Series(TM), our latest high-voltage propulsion lithium-ion batteries. These battery systems are designed for rigorous use in commercial electric vehicles, large industrial electric vehicle applications and marine propulsion. Built for scalability, our modular battery packs can be connected in series or parallel. We offer a range of standard off-the-shelf options for turnkey solutions, as well as custom battery systems--all engineered and manufactured in the U.S. Find an option that works for you, connect and go.

Ranging from 50 - 100 kWh of energy, our T350 battery systems are designed for scalability to meet your exact energy needs. Additionally, integrated liquid cooling and state-of-the-art battery management systems help to regulate battery performance.

Our 700V high voltage lithium ion battery packs can be connected in parallel to meet higher energy requirements. We offer our 700V 100 kWh solution for medium and heavy duty commercial electric vehicles.
