

400w wind turbine alternator 12v 24v

400w wind turbine alternator 12v 24v

+Wishlist

I just ordered a 3rd unit. I have had two added as night helpers on solar powered internet relay towers. Winter charging has been vastly improved, some times withstanding enormous winds and icy conditions. Lost blade tips on one, probably flying critter. Going into third winter, ordered one as quick change spare. Recommended product TPDIN2 as monitor for current and voltages. Highest read on acid battery bank (2-24v Trojan 6v groups) with these hit around 30 vdc for while in heavy winds.

Received the item in a timely manner. The big green unloader had one bent foot. I was disappointed in the fact that there's alot of customer fabrication to do. The instructions showr re-enforced flanges but they only send one flat flange for the top. They want a lightning suppression system and guide wires installed on the pole and cement anchor bolts in the base but none of those parts are included. Good thing I'm a Mechanical Contractor with resources.
