

48v 20ah lifepo4 battery pack

48v 20ah lifepo4 battery pack

Bioenno Power, based in Santa Ana, California, is your trusted source for cutting-edge power solutions. With a legacy of excellence, we provide innovative, sustainable, and top-tier battery solutions. Explore our products and shape a cleaner future with us. Thank you for choosing Bioenno Power, where power meets precision.

We feature offers with an Add to Cart button when an offer meets our high standards for: Quality Price, Reliable delivery option, and Seller who offers good customer service "No featured offers available" means no offers currently meet all of these expectations. Select See All Buying Options to shop available offers.

To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzed reviews to verify trustworthiness.

Select a charger and fill your battery information in the page of the charger with any other requirement. We will follow your information and customize charger accordingly.

4S-96S LiFePO4 BMS. This type of BMS is most widely used with the feature of reliable and good cost performance. Resistor bleeding cells balancing is the most widely used cells balance technique

4S-96S LiFePO4 BMS. Cells balance by capacitor energy storage and transfer technique which is working during charging, discharging and static state. It balances cells by energy transfer from higher cell to lower cell (by nominal 100mA). Save energy and reduce heat emission in balance process

1st battery was fine and gave 60~miles. I bought a spare and it was 3lbs~ lighter. First full charge full discharge was 38 miles ~. Yet 3rd full charge/discharge gave 60~ miles. Basically same as the larger first battery. So FYI these newer smaller batteries supply same as the first one did. I'm in Florida and flat land. 16" tire hub motor @ 300 watts. That is my experience. Very happy with both batteries. Just testing them out. Highly recommend them.

Ronald Manzi here. Just used second battery went 38 miles. This second battery is slightly smaller than the first battery and 3.25 lbs lighter. So... range was less. I can only guess perhaps new product being refined. I was just testing it. No problems with the first battery. Happy camper.

This is my second purchase as a backup battery. (Just in case, you'll grow dependent on the extended travel ability) The first one gets me and my recumbent bike with a 300 watt motor a good 50 miles. Front hub motor on a 16" wheel. The speed I get is about 15 mph. It takes about 10 hours for full charge. I've charged 70 cycles so far. They recommend fully discharging and fully charging first few cycles. Very happy, and the

48v 20ah lifepo4 battery pack

battery does not ever get hot.
