

5 kWh byd energy storage

5 kWh byd energy storage

Off-grid applications and emergency power capability pose no problem for the Battery-Box. The high discharge capacity allows for operation disconnected from the electrical grid. Whether the project supplies power to a remote cabin or it is used as backup for sensitive loads, BYD has the right storage for you.

Self consumption of renewable energy is the future. As renewable generation subsidies decrease around the world and electricity prices increase it becomes more economical to consume the energy you generate yourself.

From single family home to commercial applications, if you can design it, you can use the Battery-Box to build it. As an installer you want to work with the same common building block but adapt it to the needs of your clients. You can even start small and add capacity at any time during the life of the product.

The cobalt free Lithium Iron Phosphate (LFP) battery from BYD guarantees maximum safety, life cycle, and power. The robust chemistry and universal design can work in a wide range of temperatures and areas around the world.

The Battery-Box meets the highest safety standards like VDE 2510-50 (HVS/HVM/LVS) and receives many awards and seals. In the independent Energy Storage Inspection of the university HTW Berlin, the Battery-Box is ranked as the battery with the highest efficiency on the market.

One Battery-Box Premium HVS is composed of 2 to 5 HVS battery modules that are connected in series to achieve a usable capacity of 5.1 to 12.8 kWh. Additionally, direct parallel connection of up to 3 identical Battery-Box Premium HVS allows a maximum capacity of 38.4 kWh. Ability to scale by adding HVS modules or parallel HVS stacks later.

One Battery-Box Premium HVM is composed of 3 to 8 B-Plus HVM 2.71 battery modules that are serially connected to achieve a usable capacity of 8.1 to 21.7 kWh. Additionally, direct parallel connection of up to 3 identical Battery-Box Premium HVM allows a maximum capacity of 65.0 kWh. Ability to scale by adding HVM modules or parallel HVM stacks at anytime.

One Battery-Box Premium HVL is composed of 3 to 8 HVL battery modules that are connected in series to achieve a usable capacity of 12 to 32 kWh. Ability to scale by adding HVL modules later.

One Battery-Box Premium LVS is a lithium iron phosphate (LFP) battery pack for use with an external inverter. A Battery-Box Premium LVS contains between 1 to 6 battery modules LVS stacked in parallel and can reach 4 to 24 kWh usable capacity. Connect up to 16 Battery-Box LVS 16.0 in parallel for a maximum size of 256 kWh. Ability to scale by adding LVS modules or parallel towers of 1 to 4 modules later.
