HOUSTON, August 20, 2024 - Aggreko, a global leader in energy solutions, announced today the addition of two new mid-node battery energy storage systems (BESS) to their Greener Upgrades line of temporary power options. The two integrated energy storage solutions are excellent options for North America customers looking for greener and more efficient energy options for larger projects and a wider variety of applications across different sectors, expanding on the capabilities of Aggreko's 30 kVA and 60 kVA small-node models.

Continuing their commitment to providing greener, more efficient and cost-effective energy solutions, Aggreko's latest innovations are designed for on and off-grid applications while also enabling reduced emissions, energy consumption, and costs. Customers can now choose from an expanded range of mobile, plug-and-play BESS, right-sizing their energy options for whichever capacity is needed for their project.

Through the Greener Upgrades initiative, Aggreko is developing updated models of their products and introducing new ones that are designed to help power the energy transition. In addition to the expanded BESS options, the Greener Upgrades line includes best-in-class low-emissions Tier 4F generators, natural gas generators, and oil-free air compressors.

Learn more about Aggreko's mid-node BESS options, or contact us to speak with a sales representative to inquire about renting the 250 kW/575 kWh and 500 kW/250 kWh systems as a part of a comprehensive and tailor-made solution.
