

95 kWh energy storage battery installation

95 kWh energy storage battery installation

In areas where power outages frequently occur, food stored in refrigerators can spoil, especially in large households that store a lot of food. Meanwhile, the frequency of power surges could cause damage to electrical appliances, which leads to potential monetary loss.

With an energy management system with battery storage in the home, the system will immediately start to supply power to the house appliances as soon as it detects a grid down, at the same time protecting electronics through an uninterrupted power supply.

Introducing the SimpliPHI 6.6 Battery--a revolutionary energy storage solution. In a world where time is of the essence, this cutting-edge battery is a game-changer, boasting an installation time of less than 5 minutes. Stack 3 units effortlessly to unlock nearly 20 kWh of compact capacity. Engineered for ease of installation, the SimpliPHI 6.6 features our revolutionary RapidStak(TM) connectors that simply click into place, eliminating the need for tedious wiring or DIP switches. And it's outdoor-rated, so no additional cabinets needed.

Briggs & Stratton has a policy of continuous product improvement and reserves the right to modify its specifications at any time and without prior notice. Please visit energy.iggsandstratton.com for the latest information.
