With a population of over 107 million people, Ethiopia is the second most populous country in Africa. Over the last decade, Ethiopia has had one of the fastest growing economies in the world. In 2017, Ethiopia's real Gross Domestic Product (GDP) expanded by 10.9 percent, and is expected to grow by 8.5%, according to the World Bank.

The overwhelming response from the Solar Industry has encouraged Expogroup to launch “SOLAR AFRICA” and after successful editions in Kenya and Tanzania Solar Africa is all set to step in the Ethiopian Market.

The region offers tremendous opportunities to suppliers worldwide, having among the strongest solar resources in the world. In particular, the region offers excellent potential for Concentrated Solar Power (CSP) and Concentrated Photovoltaic (CPV) systems.
