Alessandro volta facts for ks2

Alessandro volta facts for ks2

Alessandro Giuseppe Antonio Anastasio Volta was born on February 18, 1745, in Como, Lombardy (now in Italy). He became professor of physics at the Royal School of Como in 1774. In 1775 Volta"s interest in electricity led him to improve a device used to generate static electricity. Volta discovered and isolated methane gas in 1776. Three years later he was appointed to the chair of physics at the University of Pavia (now in Italy).

In 1801 Volta went to Paris, France, to demonstrate his battery's generation of electric current before Napoleon, the ruler of France. Napoleon made Volta a count and a senator of the kingdom of Lombardy. Austrian Emperor Francis I made Volta director of the philosophical faculty at the University of Padua (now in Italy) in 1815. Volta died on March 5, 1827, in Como.
