

Angola solar installation

The Angolan authorities have inaugurated a 25.3 MW solar park built by Portugal's MCA and Sun Africa. The project is the fourth of seven installations that are being built for the Angolan government, with a combined capacity of 370 MW.

Portugal's MCA, in consortium with US-based Sun Africa, built the Luena Photovoltaic Park in eastern Angola. The EUR37 million (\$39.9 million) project features around 44,000 solar panels and will supply electricity to almost 60,000 people.

The solar park is the fourth of seven such installations that MCA is building for the Angolan government. All seven are expected to be operational by the end of this year, with a total capacity of 370 MW. The first solar project was completed in August 2022.

The installations are part of the Energia Angola 2025 plan, which aims to diversify the country's energy mix to ensure that around 77% of the rural population has access to electricity.

According to statistics from the International Renewable Energy Agency (IRENA), Angola had 310 MW of deployed solar at the end of last year, up from 285 MW in 2022.

Last year, Angola's Ministry of Finance secured EUR1.29 billion to finance the construction of 48 hybrid PV systems across six Angolan provinces. MCA is managing and building the projects.

Representing the country's official energy event, AOG 2022, in partnership with the Ministry of Petroleum and Mineral Resources of Angola, will take place in Luanda on 29-30 of November and December 1st, 2022.

The MSGBC Oil, Gas & Power conference remains the only event entirely dedicated to exploring energy opportunities in Mauritania, Senegal, The Gambia, Guinea-Bissau and Guinea-Conakry.

Delegates are able to access high-level insights from African policymakers and government officials,

Angola solar installation

one-to-one investor matchmaking services and exclusive oil and gas market forecasts.

Amid first LNG exports and revitalized oil production, the Republic of Congo will host the inaugural forum on March 25-26, 2025, hosted by the Ministry of Hydrocarbons.
