"We are trying to come up with a pilot scheme by bringing a number of electric vehicles into the country and increasing awareness," Haji Azhar, Brunei's Permanent Secretary (Energy) at the Ministry of Energy was quoted as saying by local daily the Borneo Bulletin on Sunday.

"Not everyone is able to go abroad to have fun," she said to the Bulletin, adding that having events at several locations instead of one could reduce traffic congestion.

He hopes for more government initiatives to educate the public on EVs and incentives for automobile dealers to bring in and sell EVs at affordable prices be introduced, as well as development of necessary infrastructure to support EVs for domestic use.

More importantly, adoption of EVs is important to curb air pollution, he said, noting that reducing the use of petrol is important in reducing overall carbon emissions.

Beyond that, Syahmie said he and his family would like to see more seafood places in the country, and the authorities to continue ensuring regulations and guidelines for food safety and keeping public restrooms clean are followed.

He believes that creating more leisure spaces, such as theme parks or better malls with popular branded goods that people travel abroad to buy will draw in more tourists.

"They have things sold at reasonable prices, the latest trend and styles and there's always collaboration with different brands that we can only get abroad," he said.

She hopes they will ensure local products are competitive, whether it be on price or quality. "While some things are cheaper and have a higher quality, I feel there are still shortcomings and it is one of the reasons we buy from abroad."

For retiree Bolhassan, he wants more 24-hour convenience stores as seen in other countries. He hopes locals can open up these stores, with their own branding. - Borneo Bulletin/ANN
