FREE Delivery is available to Prime members. To join, select "Try Amazon Prime and start saving today with FREE Delivery" below the Add to Cart button and confirm your Prime free trial.

Important: Your credit card will NOT be charged when you start your free trial or if you cancel during the trial period. If you're happy with Amazon Prime, do nothing. At the end of the free trial, your membership will automatically upgrade to a monthly membership.

This item has been tested to certify it can ship safely in its original box or bag to avoid unnecessary packaging. Since 2015, we have reduced the weight of outbound packaging per shipment by 41% on average, that's over 2 million tons of packaging material.

To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzed reviews to verify trustworthiness.

"...I still give it 4 stars because its a great little item and very well made and thought out. (with the exception of the charging clamps)" Read more

"...The next day i checked it before connecting to fish finder. It would not power on. I checked connections. Did not find anything obvious...." Read more

"...I can use it to recharge my USB cells, run my USB fan, and charge my phone, to name a few uses.I have already used it out on my patio...." Read more

"...The second and more concerning problem is how fragile the plastic is. The box fell from my work bench and the entire bottom cracked...." Read more

"...Did not find anything obvious. Fuse was blown. I replaced 10A fuse. It also blew. Sending back to Amazon. Going with a battery \$100 cheaper." Read more

"...The box fell from my work bench and the entire bottom cracked. Admittedly, this was my fault but I expected the plastic to be more durable...." Read more

LiFePO4 batteries have become increasingly popular due to their high energy density, long lifespan, and excellent safety record. However, to fully utilize the potential of these batteries, it is essential to have a well-designed battery box. In this article, we will guide you through the process of building your own DIY battery box for LiFePO4 batteries, ensuring optimal performance and safety.

Battery box lifepo4

Before diving into the construction of a DIY battery box, it is crucial to understand the basic characteristics of LiFePO4 batteries. LiFePO4 stands for Lithium Iron Phosphate, which is the primary cathode material in these batteries. They are known for their high energy density, low self-discharge rate, and ability to deliver high currents. Additionally, LiFePO4 batteries are non-toxic and environmentally friendly, making them an ideal choice for various applications.
