Battery research and development sao tome and principe

This story map illuminates São Tomé and Príncipe's proactive approach to addressing increasing flood impacts and the complex challenges posed by such climate risks.

The United Nations Development Program is seeking consultants to build a 2 MW solar project and three hydropower plants ranging in generation capacity from 1.15-2 MW.

The United Nations Development Program is seeking consultants to conduct feasibility studies for a 2 MW solar project and three mini hydropower plants ranging in size from 1.15-2 MW in São Tomé and Príncipe.

The African Development Bank says São Tomé & Príncipe has an electricity access rate of around 70% and installed power generation capacity of 35 MW, some 95% of which comes from thermal power. Of that theoretical capacity, however, only 58% is available, due to ageing generation assets and lack of maintenance.

The MacaHub website which reports on relations between China and Portuguese-speaking countries quoted Celestino Andrade, MD of São Tomé & Príncipe state-owned utility EMAE as describing his electric company as "technically insolvent and [in] need [of] urgent restructuring."

MacaHub reported the monopoly-holding utility owes around \$140 million to national fuel and oil company ENCO and \$80 million to other suppliers and spends \$2 million per month on 2.2 million liters of fuel for its interconnected and isolated power plants.
