

Battery solution 250 kWh

Battery solution 250 kWh

For directed energy and other applications requiring very high pulse power, Saft offers a scalable and compact 250-500 kW battery system. The 250 kW system is a building block for larger, higher power 500 kW, 750 kW and higher systems, with independent 250 kW outputs. This very high power battery system has demonstrated long life, safety and reliability in laser applications for customers such as General Atomics and Raytheon.

HOUSTON, Aug. 20, 2024 (GLOBE NEWSWIRE) -- Aggreko, a global leader in energy solutions, announced today the addition of two new mid-node battery energy storage systems (BESS) to their Greener Upgrades line of temporary power options. The two integrated energy storage solutions are excellent options for North America customers looking for greener and more efficient energy options for larger projects and a wider variety of applications across different sectors, expanding on the capabilities of Aggreko's 30 kVA and 60 kVA small-node models.

Continuing their commitment to providing greener, more efficient, and cost-effective energy solutions, Aggreko's latest innovations are designed for on and off-grid applications while also enabling reduced emissions, energy consumption, and costs. Customers can now choose from an expanded range of mobile, plug-and-play BESS, right-sizing their energy options for whichever capacity is needed for their project.

Through the Greener Upgrades initiative, Aggreko is developing updated models of their products and introducing new ones that are designed to help power the energy transition. In addition to the expanded BESS options, the Greener Upgrades line includes best-in-class low-emissions Tier 4F generators, natural gas generators, and oil-free air compressors.

To learn more about Aggreko's mid-node BESS options, visit or visit <https://> to speak with a sales representative to inquire about renting the 250 kW/575 kWh and 500 kW/250 kWh systems as a part of a comprehensive and tailor-made solution.

Operating in a rapidly changing energy market where reliable supplies of energy have never been more

Battery solution 250 kWh

critical, we provide customers with power and temperature control solutions when, where and for however long they need it.

Using the latest technologies, we combine our innovative thinking with our sector knowledge to help our customers achieve their goals, however complex, through a range of flexible, modular solutions.

We're investing in more sustainable products, fuels, and services to make greener solutions accessible for our customers, supporting their move to a more sustainable and efficient future.
