

Battery solution 30 kWh

Battery solution 30 kWh

The battery system comes in many different sizes and configurations options. When you purchase your battery system, we will reach out to schedule your dedicated session with our technical experts, who will make sure your system is fit to your specific needs. This ensures personalized service and scheduling at your convenience. Our team of energy experts are ready to help you tackle any solar, battery, and backup configuration you can imagine.

IMPORTANT: Emporia will not ship your order until we've spoken to you and ensured that the battery solution will operate effectively for your selected application. We do not accept returns. Additional Shipping Charges may apply. Therefore all orders can be adjusted anytime prior to fulfillment without penalty. We're excited to work with you.

Once you purchase your battery system, we'll reach out to schedule a free virtual consultation with an Emporia Energy Expert who will analyze your energy usage and recommend the best battery system configuration for your home and budget. Our battery is modular and completely customizable - no need to install anything but the perfectly sized system.

When you have your battery installed by a certified SolaX battery installer, you'll have a 12-year/6000 cycle warranty on your battery. When we match you with an installer partner, they will have all required certifications for the warranty to apply. If instead you want to find your own installer, you'll need to make sure they take the SolaX training if you want your system covered by warranty.
