

Battery storage afghanistan

Battery storage afghanistan

One of the largest off-grid solar systems in the world, producing 1 MW of power, this vast PV array coupled with advanced lead battery energy storage, is located in the mountains of Bamyan, Afghanistan, famously known for its Giant Buddha statues.

Part of the Renewable Energy Program funded by New Zealand's government, the project provides 24-hour power to 25,000 homes, businesses, hospitals and government officers for this central mountainous region.

Involving a mix of solar, lead battery storage and diesel backup, the renewable energy project provides sustainable and cost-effective electricity to local people. Prior to installation, residents relied on small diesel generators, domestic solar panels or no power at all.

Due to its mountainous location, subject to extreme temperatures as low as -25°C in the winter, advanced lead batteries were chosen for their reliability and robustness.

Crown has 12 sales and distribution offices throughout North America, 600 employees and a network of authorized business partners, distributors and dealers throughout the Americas, Europe, Africa, Asian-Pacific, Australia and New Zealand.

Crown's operating principle - "The Power Behind Performance" - represents Crown Battery's commitment to providing power to millions of people around the world - power that makes life easier, and raises standards of living, health and safety for the communities we serve.

Afghanistan sits atop vast lithium reserves and faces a pivotal decision: leverage this mineral wealth to assert national sovereignty and drive local development or risk exploitation by foreign powers eager to dominate the global supply chain for electric vehicles (EV).
