## Best car battery brands 2024

Consumer Reports" tests show the best car batteries for 2024 when it comes to overall performance, with picks in several type categories and advice on where to buy.

Whether your car is electric, internal combustion, or remote-controlled, it will have a battery. Here we focus on internal combustion and what you need to know before making a purchase.

The best car batteries recently rated by Consumer Reports and what you need to know before and after buying a new car battery to ensure that it lasts its longest.

In operation for more than a century, AC Delco has been recommended as "the only batteries" for GM vehicles. You'll find them at retailers like AutoZone, O'Reilly Auto Parts, Amazon, and even some Walmarts. They're reliable, reasonably priced, and come with a good warranty, 18 months or above, depending on where you buy. A great AC Delco battery to call out is the Advantage series.

Bosch is a solid mid-grade battery provider both in quality and price. They do have some affordable options, but their premium lines are still reasonably priced, with several tiers available for a wide variety of vehicles. The downside is that Bosch batteries are not carried by all retailers like some of the other options on our list, but you can find them online. You can also visit a Bosch service center if there's one near you. Callouts are the S4 to S6 series and the T4 to T6 series. We will say the brand's four-year free replacement warranty is unmatched.

Dakota only offers Lithium batteries but they come with an incredible warranty, up to 11 years for some of their products. They're also more expensive, but reliability is never in question when you have a Dakota. Unfortunately, you may have a hard time finding them at local retailers and stores, but they are available online through Amazon.

You may recognize EverStart as Walmart's store-brand batteries, which are relatively well-reviewed, affordable, and versatile — they're compatible with many types of vehicles. The multi-year warranty is also great, especially if you live near a Walmart. If you're in a bind and need a battery fast, EverStart is certainly a viable option. Although, if you have access to some of the other brands on this list, you might consider an alternative first. Some callouts are the Maxx and Platinum AGM series.

Interstate batteries have been available through Costco and several other retailers since the early 1950s. The brand is well-known, with some decent warranties, from 18 months to 48 months, for their more expensive products. If they're available locally, don't shy away, but do know that they are not usually produced by any one manufacturer. Instead, they come from various facilities as opposed to Exide or Delphi-made batteries. Callouts include the MTX and MTZ AGM series.

## Best car battery brands 2024

Produced by Clarios, Ford Motorcraft is nothing short of a legendary auto battery maker. If you own a Ford and you want to go with an OEM battery, Motorcraft is the way to go. You'll find them at many retailers, like O'Reilly Auto Parts or Walmart. They're priced well, if not a bit more expensive than the cheaper options, compatible with a range of Ford trucks and cars, and come with a 36-month (three-year) free replacement warranty. Notable Motorcraft batteries are the BAGM and VMAX variants.

It's a shame Odyssey isn't as popular in the battery world as some of the other brands on this list, at least not as widely known as it should be. Its batteries, like the Extreme series, are reliable and have long shelf lives, and the company offers a welcome four-year full replacement warranty. You'll find them at NAPA, Advance, Walmart, Amazon, and more.

For over 40 years, Optima has offered a range of battery products for cars, trucks, RVs, and marine vessels. It also offers a few battery chargers if you want to try your hand at recharging your existing battery. They're not cheap, but they are super reliable and come with an excellent warranty. Callouts include Optima REDTOP and POWERSPORTS.

Quite new when compared to other battery brands on the list, XS Power has made its mark on the industry by providing overpowered batteries for a range of applications, including commercial and military use. You'll find them at third-party retailers and online, such as Amazon, Walmart, and, oddly enough, . They specialize in AGM and Lithium variants, no lead-acid, with high-performance use being the focus. Most batteries have a one to three-year warranty with a 60-day risk-free guarantee from the brand.
