

Best ice fishing lithium battery

Best ice fishing lithium battery

The DL 23 Ah battery is built with Dakota Lithium's legendary LiFePO4 cells. 2,000+ recharge cycles (roughly 5 year lifespan at daily use) vs. 500 for lead acid or AGM. Optimal performance down to minus 20° Fahrenheit (for winter warriors). Plus twice the power of lead-acid batteries at half the weight.

Tournament Lithium small-format batteries are designed to work with flashers and underwater cameras, to supply days of power for your equipment in a small, light yet powerful little package.

Use directly with your electronics or through a power pack case, and you will have days of power to allow you to do what you do best, catch fish. Tournament lithium batteries can be used standing up or on their sides, and we have different case sizes for the same capacity battery. For example, our Tournament Lithium 12v 24ah battery comes as a square battery or a slimline battery to fit into existing cases.
