

Bms 72v lifepo4

Bms 72v lifepo4

Select a charger and fill your battery information in the page of the charger with any other requirement. We will follow your information and customize charger accordingly.

4S-96S LiFePO4 BMS. This type of BMS is most widely used with the feature of reliable and good cost performance. Resistor bleeding cells balancing is the most widely used cells balance technique

4S-96S LiFePO4 BMS. Cells balance by capacitor energy storage and transfer technique which is working during charging, discharging and static state. It balances cells by energy transfer from higher cell to lower cell (by nominal 100mA). Save energy and reduce heat emission in balance process

To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzed reviews to verify trustworthiness.

This bms is especially for 24S Bluetooth or smart fixed configurations. Basically it can also be used for any other lithium technologies even if LiFePo4, Lithium Ion, LiPo and Lithium Metal by changing internal parameters after connecting to Bluetooth App or computer. Most important that it is strictly for 24S battery packs only. As a result, that they cannot be used for any other battery pack Configurations.

In the same way all Parameters can be changed Via Bluetooth App or UART USB Connection with PC Monitoring Program fault setting inside BMS are for LiFePo4 batteries.

discharge < 70 °C Working current 100uA Sleeping current (when in discharge) 20uA Working temperature range -20 ° to 70 °C Storage temperature range -40 ° to 80 °C Weight 16 ounces
Size 6.2*3.9*0.6In Wiring Diagram Daly wiring diagram Example for Daly BMS Wiring Diagram: <https://dalybms.com/16s-bms-wiring-tutorial/>
