## Businesses that use renewable energy

Dominion Energy is on a mission to deliver reliable, affordable and increasingly clean energy. As part of the company's sustainability strategy, Dominion is committed to reducing methane emissions from its natural gas infrastructure 55% by 2030. Inspired by the beautiful surroundings in Virginia, the company's wildlife protection has included converting 43,000 acres of open space to pollinator habitat, recycling concrete to expand two artificial reefs to create new fish habitats, and planting 6,000 plants to reestablish beach grasses to protect freshwater marshes.

Edison International is the parent company of Edison Energy and Southern California Edison (SCE) which was formed from predecessor companies going back to 1886. The company is currently working towards many sustainability and ESG goals including increased EV charging infrastructure, gender parity in senior operating roles by 2030 and public and worker safety goals.

Exelon is a Fortune 250 company serving more than 10 million customers through six fully regulated transmission and distribution utilities – Atlantic City Electric, Baltimore Gas and Electric, Commonwealth Edison, Delmarva Power & Light, PECO Energy Company, and Potomac Electric Power Company.

DTE is a diversified energy company involved in the development and management of energy-related businesses and services nationwide. Its operating units include an electric company serving 2.3 million customers in Southeast Michigan and a natural gas company serving 1.3 million customers in Michigan. The DTE portfolio also includes non-utility businesses focused on industrial energy services, renewable natural gas, and energy marketing and trading.

AEP serves nearly 5.6 million customers in 11 states through the largest electricity transmission network in the nation, stretching more than 40,000 miles. Founded in 1906, the company has about 25,000 megawatts of diverse generating capacity, including more than 7,100 megawatts of renewable energy.

Founded in 1925, NextEra Energy is one of America's largest capital investors in infrastructure, with between US\$50bn and US\$55bn in new infrastructure investments planned through 2022. In 2023, NextEra Energy was again ranked No. 1 in the electric and gas utilities industry on Fortune's list of "Most Admired Companies" for the 16th time in 17 years.

Founded in 1905 in California, Pacific Gas and Electric Company is one of the largest combined natural gas and electric energy companies in the United States, providing natural gas and electric service to approximately 16 million people throughout a 70,000-square-mile service area in northern and central California. The company is committed to a net zero energy system in 2040—five years ahead of California's current carbon neutrality goal—; as well as increasing renewable electricity by 70% and renewable
