Buy lithium batteries online

We're the creators of Ionic, bringing you revolutionary technology at an affordable price point. Imagine a battery that lasts longer, works harder, and plays smarter. That's Ionic. Our Ionic lithium batteries ship for free, have 100% USA based support, and many of our batteries feature a world-class, 11-year warranty!

We offer a variety of battery types, including marine, RV, golf cart, lawn mower, UTV batteries, and more. Order your Ionic lithium battery today and experience the difference!

Not all lithium batteries are created the same. Here at Ionic, we believe in quality over quantity. We manufacture our Ionic lithium batteries with only the best materials possible. Our purpose? To provide reliable, consistent battery power for our customers always. Batteries that can handle both your recreational and work related needs with ease.

That means we use only Grade A cells, equip our batteries with an advanced battery management system (BMS), offer the most technologically advanced battery features, and always thoroughly inspect our batteries.

Make sure you're always ready for what the day has in store. No one wants to lug their camping or boating equipment out of the garage only to find a dead battery that needs attention. That's no way to start your day. With Ionic lithium batteries on deck, you can check the level of your charge by opening up the Ionic Battery App. Check the status of your charge from your breakfast table! It's as easy as that. Now you can plan your day without any unnecessary stops or annoying interruptions..

Batteries aren't one size fits all. If you're looking for unparalleled performance, then you'll want to pay special attention to the type of battery you choose. Not to mention the size, capacity, and depth of discharge. Ionic batteries come in many different sizes. For instance, our LiFePo4 12V 30Ah Ionic lithium battery is ideal for starting Side-by-Sides/UTVs and powerful zero-turn mowers. They are even powerful enough to start a 400hp engine.

Whether you're looking to power a few low powered gadgets on your bass boat or need a powerful RV battery with a built-in heater, we've got you covered! Making the switch to an Ionic lithium battery can save you a lot of time, money, and frustration in the long run. Getting those 5 acres mowed in the back is a breeze with a long-lasting Ionic battery. The yard's finished so why not power up the bass boat next?

Like lithium, lead acid batteries are meant to be recharged. Their low upfront cost makes them a winner for many upfront, but the savings can quickly dwindle. On average, lead acid batteries last only a few hundred cycles before they begin to age. This often leads to more poor performance. In addition, you'll need to constantly maintain your battery or risk damaging it. And toxic leakage is another worry.

Buy lithium batteries online

The upfront cost of AGM batteries is higher, but once you have them installed they're less likely to need maintenance. The only problem? Overuse or neglect can cause damage and an expensive replacement situation. We're talking about a whole new battery after all, not a simple tune-up.

Gel batteries may be a great choice for those who don't want to recharge their battery often. You can store them for long periods without losing their life. They come with a heftier price tag, but they're often a better long-term investment than lead acid. One of the main downsides is that it can take up to 12 hours for a gel battery to charge. And you need to monitor the charge throughout the process. If you don't disconnect your charger upon completion, you risk irreversible damage.

An Ionic lithium battery is the best option if you want a long-lasting, more cost-effective, maintenance-free device. Lithium also weighs less and you don't have to worry about harmful chemicals harming the environment. Bluetooth technology makes it even easier to gauge the remaining charge. Thanks to the battery management system (BMS), Ionic batteries won't overcharge - it stops charging as soon as it's done.

Ionic lithium batteries are a popular choice for boaters, anglers, RVers, and other outdoorsmen. They provide long-lasting power with consistent output. They're the perfect choice for seasoned pros or weekend warriors!
