All warranties are effective from the date of purchase by the end user. Correct installation and usage as specified in the product manual are required to maintain warranty eligibility.

Please take time to carefully review the manual prior to setup and operation to ensure proper use and long-lasting performance from your LiTime system. We're here to support you throughout the warranty periods.

One 48(51.2)V 100Ah lithium battery equals to 8* 6V 210Ah lead-acid batteries in usable energy. With 80% lighter in weight and 50% smaller in size, we make your golf cart more maneuverable, faster and with less wear & tear. Most importantly, we are more Cost-Effective to help you save over \$320 per year in capital and technical maintenance costs.

LiTime 48V golf cart batteries update to all-new Bluetooth lithium golf cart batteries. This 48(51.2)V 100Ah LiFePO₄ battery adopts Bluetooth and EV grade-A prismatic cells, ensuring you a better user experience and a 10+ years lifespan st Green Energy Solution For Your Golf Cart. LiTime 48V golf cart batteries update to all-new Bluetooth lithium golf cart batteries.

Born for club cart golf carts, LiTime battery is perfectly compatible with Golf Carts brands of Club Car, EZGO, ICON & Yamaha. It can easily power your golf cart even in steep areas with its 1C continuous discharging current and 600A(1S) peak discharging current.

Equipped with Bluetooth 5.0, LiTime 48V lithium golf cart batteries realize a brand-new upgrade. New-generation Bluetooth lithium battery supports auto-connection, smart control and real-time monitoring, providing you unprecedented user experience.

Low-temperature cut-off protection ensures optimal operation in any condition. It can automatically cut off charging when the cells are below 32°F and discharging below -4°F, guaranting maximum battery lifespan and charging efficiency. Drive your golf carts as you desire and never mind the limitation of weather and regions.

LiTime adopts the best lithium cells for your golf cart batteries. Our EV grade-A Prismatic LiFePO₄ cells provide 5120Wh green energy and 200A BMS, making your golf carts withstand larger surges and run longer and more smoothly. Prismatic shell technology makes the battery more uniform in force area and has better heat dissipation than similar battery cells.

LiTime's self-developed 200A BMS defends dust, water, and salt spray; its 20+ protections safeguard against over-charging, over-discharging, over-current, overheating and short circuits; overload protection with

auto-recovery let user's have no extra invention; its low-temperature cut-off function guarantees a safe charge/discharging operation in cold scenarios.

One LiTime 48V 100Ah lithium golf cart battery can release 5120Wh Energy. That means you can drive your cart and enjoy 7~9 rounds of 18-hole golf tournaments. So large energy can run 40~47 miles when fully charged, allowing you to enjoy double the runtime of the AGM battery.

The 48 volt lithium golf cart batteries flexibly support a 58.4V LiFePO4 charger or solar panel to charge. It can be charged with Max 1C charging efficiency, much faster than regular lead-acid batteries. Approx 3.3hrs can realize a full charge with a 58.4V 30A LiFePO4 charger.
