

# Charging station on my route

## Charging station on my route

Prioritise or limit a charging network, avoid tolls and motorways or log in a maximum speed to save on energy. The planner takes your charging preferences on board.

Chargemap automatically calculates your route and selects the charging stations that match up with the information you have logged in. You can also visualise your route directly: distance, overall travel time and the necessary charging stop(s) along the way.

You want to see all the charging stations available along your route? Tap on the "Stations" button to find all the charging stations available in your vicinity.

You want to take a charging break near a restaurant or go for a pub lunch? Click on the "Stations" icon then on the "Filter" cursor to fine-tune your charging preferences on your personalised route.

When you reach a specific point along your way, you want to stop for longer to have a lunch break or take a stroll in the surrounding area. You can modify either the duration of your break, or the battery level you want before resuming your journey.

You want to profit from a charging stop to do a bit of sightseeing or go and see friends and family and so you are looking for a charging station in the vicinity. The route planner allows you to select an alternative charging station along the way.

With Chargemap, plan your ideal route by selecting the charging stations of your favourite networks. The tool automatically calculates a new route based on your preferences.

PlugShare is also home to the largest community of EV drivers in the world. Every day, drivers add more station locations, constantly making the app more comprehensive, powerful and accurate. From within the app, users check-in when they charge, sharing tips, comments, and photos of their charging experiences.

Thousands of drivers also list their personal home charging stations for public use on PlugShare, helping to fill the gaps in the charging infrastructure. These drivers have complete control over the times and terms of their station's availability, how other members can contact them, and what personal information is displayed.
