

Chile battery testing

Chile battery testing

SGS battery testing services can identify your target market regulations for cells, batteries and modules to ensure compliance with contractual or regulatory requirements.

Developing the highest quality batteries, that are safe and reliable, is a complex challenge in today's competitive global market. We can provide expert testing services for abuse, benchmarking, durability, electrical, electromagnetic compatibility (EMC), environmental, life cycle analysis, performance, safety standards and transportation on cells, batteries and modules.

Expert and experienced, we conduct battery comparison testing against both national and international standards, as well as battery life cycle analysis. With an increasing focus on renewables and energy efficiency, we also carry out testing for renewable energy storage systems and energy efficient battery management.

Our ISO/IEC 17025 accredited testing laboratories and specialized local experts have extensive experience with battery testing, and offer a range of services to manufacturers and buyers in the industry. With unrivaled experience we can provide all the required technical verifications, safety settings and factory auditing services.
