Commercial solar mexico

Electricity generated by the Solar Akin plant will be connected to Mexico's National Electricity System (SEN in Spanish) and provide renewable energy to the region. This is not the first solar park Engie has built in the state of Sonora, with the 108MW Abril solar park located nearby and commissioned in 2022.

Installed solar capacity in Mexico reached 9.4GW at the end of 2022, according to energy think tank Ember. Despite high land availability and high potential for both solar PV and wind, renewables in the country have yet to take off, as policy changes since Andr s Manuel L pez Obrador took office in 2018 have hampered the growth of solar in Mexico in the past few years.

Although solar activity in Mexico is not booming as in the neighbouring US, earlier this month, London-based renewables investor Cubico Sustainable Investment acquired a portfolio of 1.6GW of solar and hybrid projects in the country.

A recent report from BloombergNEF about corporate power purchase agreements (PPAs) found that Engie signed the most renewables capacity in 2023 with 2.4GW, followed by energy company AES with 1.9GW and Indian integrated energy company Tata Power with 1.2GW.

Gecko Logic Mexico offers renewable energy systems that can be interconnected to CFE under the net metering system now available in Mexico. Our solar panel systems are designed specifically based on your historic energy usage, and later built to capture the energy from the sun through solar cells, filter and transform that energy by a solar inverter and later used by all of your electrical appliances in your place of business in Mexico.

Our solar panels will generate big time savings on your energy bill and contribute to a more sustainable planet by limiting harmful emissions to the atmosphere and slow down global climate change.

According to statistical information from the Sistema de Informacion Energetica (SIE) and CFE, the electricity rates in the residential sector nationwide have increased an average of 6% annually in the last 16 years, due to the current macroeconomic circumstances we estimate that the annual price growth will increase in the coming years.

Act today and freeze your electricity rate prices by installing a solar panel system from Gecko Logic, take advantage of the power of the sun and capture that energy for your own benefit, this is the best option to reduce or completely eliminate high electricity bills in Mexico.

We are a licensed solar power installer and certified nationwide by FIDE, ANCE and FIRCO, additionally our sister company in California is licensed and insured to provide these kind of services in the states. All of our
