Commercial solar panels gold coast

At Solahart Gold Coast, Redlands & Beenleigh, we specialise in commercial solar power systems that deliver reliable, energy-efficient solutions tailored for businesses of all sizes. Whether you're looking to reduce overhead costs, enhance your sustainability efforts, or future-proof your energy supply, our commercial solar systems are designed to meet the unique needs of commercial clients across the region.

Simply fill in the details of your latest bill and we'll find out if there's a system that can reduce your power bill to zero, or even give you money back!

Solahart's commercial solar water heating range means that we are able to support a project from design stage to occupancy and beyond, in the process serving the needs of architects, developers, builders, selling agents and consumers. We have successfully completed many commercial scale projects, working alongside our clients to share our expertise and to function as an integral part of their team.

Solahart Gold Coast, Redlands & Beenleigh has signed on to the Clean Energy Council Solar Retailer Code of Conduct, a voluntary scheme authorised by the Australian Competition and Consumer Commission (ACCC). By choosing a company that has signed on to the Clean Energy Council Solar Retailer Code of Conduct, you are buying from a company that provides a minimum five-year whole of system and installation warranty and has committed to a high level of customer service.

Gold Coast Energy has been a leading Gold Coast Solar installer in SE Qld and Northern NSW for over 15 years. Our commitment to our customers continues after installation with lifetime servicing available. We are firmly positioned as an industry leader and one of the most established solar companies in Australia.

When you choose Gold Coast Energy you will have peace of mind you are receiving the latest and very best technology and products from solar panels to solar inverters and solar batteries. We treat you as an individual, from a complete assessment of your individual needs, to installation and servicing, our team of industry expert's care about your solar system and working to achieve the best results for you, at the most competitive prices.

Make the switch and power your home using free energy! Installing a Solar PV System to your home will significantly reduce your energy bills. In fact, combined with a solar battery solution, you can become a self-sufficient household and reduce your reliance on drawing power from the grid.

With homes usually using more electricity at night, by installing a solar battery system such as Tesla Powerwall 2 you can store your solar power for when you need it most, further reduce your power bills and gain more energy independence. A solar battery will also provide you with an uninterruptible power system.

Did you know we are not just solar installers; we are a servicing company as well. Unlike some solar companies, we will provide you with exceptional service throughout your solar journey, from installation and beyond.

Gold Coast Energy delivers the highest level of service at affordable prices. After a service, it is not uncommon for most people to see an improvement on their next bill, anywhere from \$50-\$150.

We do solar 24/7, which means we are always keeping up to date with the latest solar technology and innovation. Gold Coast Energy is an industry leader and we proudly align ourselves with supply partners that deliver the latest technology and industry leading warranties.

When you choose Gold Coast Energy you are guaranteed the best solar products, technology and service available. Gold Coast Energy also offer innovative monitoring options, meaning you can always evaluate how your system is working.
