Denmark geographic locations

Denmark geographic locations

Denmark is a Nordic country located in Northern Europe. It consists of the Jutland Peninsula and several islands in the Baltic Sea, referred[citation needed] to as the Danish Archipelago. Denmark is located southwest of Sweden and due south of Norway and is bordered by the German state (and former possession) Schleswig-Holstein to the south, with a 68-kilometre (42-mile) long land border.

Denmark experiences a temperate climate, with mild, windy winters and cool summers. The local terrain is generally flat with a few gently rolling plains. The territory of Denmark includes the island of Bornholm in the Baltic Sea and the rest of metropolitan Denmark, but excludes the Faroe Islands and Greenland. Its position gives Denmark complete control of the Danish straits (Skagerrak and Kattegat) linking the Baltic and North Seas. The country"s natural resources include petroleum, natural gas, fish, salt, limestone, chalk, stone, gravel, and sand.

Freshwater withdrawal (domestic/industrial/agricultural):total: 0.66 km3/a (0.16 cu mi/a) (58%/5%/36%) per capita: 118.4 m3/a (4,180 cu ft/a) (2009)

In 2019, the government proposed building 9 new artificial islands, named project Holmene, which would create 3 km2 (1.2 sq mi) of reclaimed land, to be built from 2022 to 2040.[4]

In June 2021, lawmakers approved the construction of a 3 km2 (1.2 sq mi) island, named Lynetteholm, in the Copenhagen Harbor.[5] A spokesperson for the Climate Movement in Denmark (Klimabevaegelsen i Danmark) said the organization would sue the government over environmental concerns.[6][needs update]

Geography - note controls Danish Straits (Skagerrak and Kattegat) linking Baltic and North Seas; about one-quarter of the population lives in greater Copenhagen

When you think about the best Nordic countries to visit in the northern part of Europe, it is difficult not to remember Denmark. Nestled between the North Sea and the Baltic Sea, Denmark can be recognized for its landscape of fiords, beaches, and rolling plains. If you want to know more about this intriguing country, then read on and get your dose of the Geography of Denmark.

The coastline of Denmark is an impressive 7,300 kilometers, making the country ideal for harbors, fishing, as well as beaches for the tourism industry. On the south end of Denmark lies a 68 kilometer border which is shared with Germany. The largest peninsula is known as the Jutland Peninsula, which is divided in to regions as well. On the eastern portion of Denmark lies the Zealand region, also known as Sjaelland. The island of Bornholm is the eastern most in Denmark, and is found to the south of Sweden and to the North of Poland.
