

Difference between apc and ups

Difference between apc and ups

When power is interrupted, or fluctuates outside safe levels, a UPS will instantly provide clean battery backup power and surge protection for plugged-in, sensitive equipment. APC, a flagship brand of Schneider Electric, offers UPS options for Computers & Peripherals, Networks & Servers, as well as Data Centers & Facilities. View all of our UPS ...

In my experience, the APC Easy UPS Online is a versatile, high-quality, cost-competitive UPS while the APC SmartUPS Online isSmart-UPSTM On-Line provides high-density, double-conversion online power protection for servers, voice/data networks, medical labs, and light industrial applications.

The main difference between the BackUPS and SmartUPS is the UPS topology they are built on. BackUPS = standby. SmartUPS (SUA units) = line interactive. SmartUPS (SURT units) = double conversion online. Please see the following kbase for a deeper discussion on this: & p ...

The difference between APC Smart-UPS and APC Easy UPS lies primarily in their design, features, and intended applications. While both provide power protection, Smart-UPS offers advanced features suitable for critical systems, whereas Easy UPS caters to basic power needs with a more straightforward approach.

With over 20 million units sold, many customers have a variety of Smart-UPS products in use. Over the years APC has steadily improved the product line. This document highlights the generations that are likely to still be used in production environments.

In my experience, the APC Easy UPS Online is a versatile, high-quality, cost-competitiveUPS while the APC SmartUPS Online isSmart-UPSTM On-Line provides high-density, double-conversion online power protection for servers, voice/data networks, medical labs, and light industrial applications. We can say that Easy UPS is for those customers who"d like to use APC"s technology but has a limited budget to work on.

I have a real simple questions for all of you in the know.What is the differnece between SmartUPS and the BackupUPS. This is probally answered someplace but for the live of me could not find it...Thanks a lotGary
