Dometic's decision to use Lithium Iron Phosphate (known as LiFePo4) makes the battery unit lightweight, compact, and able to deliver stable power for a longer time compared to the Lithium Ion batteries currently available on the market.

Specifically designed to power a cooler, such as a Dometic CFX for a weekend, 12V devices, and USB accessories, the battery has a 2-pin threaded connection and flat discharge curve. Its robust and rugged features make it ideal for outdoor use.

Another innovation of the PLB40 is its multiple power sources: 12 V vehicle socket, solar panel or AC power. This allows users to charge the battery while driving- saving time and the need for an extra battery.

Some customers have asked for an ultra-portable solar charger that packs even smaller and lighter than our traditional 130-watt triple folding charger. At 7.5 pounds Overland Solar has answered the call with the 130-watt nylon backed Sunpower solar charger for use in dry weather, if the panels get wet it should be dried before folding back up for long term storage. This is big power when you need to charge more than phones, tablets, and the GPS.

You're ready for adventure. Your 4x4 rig should be ready for it, too. At Main Line Overland, we sell a vast selection of the best overland vehicle upgrades and off-roading accessories the industry has to offer. With over 10 years of experience as a full-service 4x4, expedition and overland vehicle outfitter at our West Chester location, we now offer our full range of products and services online. Our valued customers can expect the same expertise and personalized customer service, no matter where their journey takes them next.

No interest if Paid in Full Within 6 Months on all purchases. Interest will accrue and be charged to your account at 34.9% APR from the purchase date if the purchase is not paid in full within 6 months, or your account becomes 180 days past due, or is charged off for any reason. Monthly minimum payments required. As a reminder, paying only the monthly minimum payment amount each month may not pay off your purchase within 6 months. You may have to make additional or increased payments during the deferred interest period to avoid having to pay the accrued deferred interest.

Portable Powerhouse: The PLB40 battery features powerful Lithium Ion Phosphate battery cells that are designed to provide stable and consistent power for whatever you may need while out on an adventure.
