Electric scooter lithium battery price

Our Lithium LiFePO₄ batteries bring you revolutionary technology ahead of its time. As the creators of the Ionic brand, we combine powerful lithium, Grade A battery cells, and Bluetooth monitoring for a battery that lasts longer, works harder and plays smarter. With LithiumHub, you're guaranteed 100% US-based support, plus a competitive, no-nonsense 11-year warranty. Explore our collection today to experience the latest in marine battery technology.

Our lithium scooter batteries are built tough, from the highest quality materials. They provide power you can rely on, for endless hours on your mobility scooter or electric wheelchair.

Looking for a safe 12v scooter battery that won't harm you, your family, or the environment? It's time to switch to leak-free, non-toxic, energy-efficient lithium.

With our LiFePO₄ batteries, you'll always know exactly how much "juice" your electric scooter or wheelchair has left. Simply check the status on your phone with bluetooth monitoring.

Zoom around as light as a feather with lithium mobility scooter batteries. They store the same amount of energy as traditional lead acid batteries, but with less than half the weight.

You're off to the park with your grandkids in your mobility scooter (or wheelchair). It's bound to be a memorable day of exploring, talking, and devouring an ice cream cone or two. On today of all days, you're counting on your scooter to perform.

But ten minutes into the excursion, you realize you have no idea how much battery power you have left. Will you have to skip the ice cream this time? Or worse...will you end up stuck far from your car with no charge?

Lithium batteries take the guesswork out of the equation. With a quick tap on your smartphone, you can see exactly how much battery life you have left. You can also discharge your battery completely or partially, and it won't cause any damage. So leave your worries behind, and focus your attention on doing what you love.

Need some help figuring out exactly which batteries you need for your electric scooter or wheelchair? Let our lithium battery experts help you find the right battery.

It's no wonder that those with mobility scooters are switching to lithium batteries in droves. Simply put, they are more reliable, energy efficient, and safer than traditional alternatives. Not to mention they are MUCH lighter. They won't weigh your mobility scooter down, or break your back when you pick them up. No matter what small electric vehicle you use, lithium is the clear battery choice, because they're:

Charge your scooter battery in as little as two hours. There's no need to worry about overcharging. The built-in charge management system will make sure that never happens. Also, lithium batteries can function in a wide range of temperatures. LithiumHub batteries will automatically detect when it's too cold to charge.

All our wheelchair and mobility scooter batteries, like our 12v scooter battery, come with an easy-to-use bluetooth monitoring system. Connect your smartphone wirelessly to your battery with bluetooth. See exactly how many volts are available, and the percentage of life left. You can also view how much longer your battery will power your vehicle, or how long it will take to fully charge.
