Electric Vehicles: Total Cost of Ownership Tool. An interactive calculator where users can compare the costs of owning and operating fossil fuel and electrified vehicles and the effect that changing different variables has on the result

China still dominates the global EV market, but sales are rising quickly elsewhere too. Electric vehicles are no longer only a wealthy country phenomenon. Developing economies like Thailand, India, Turkey, Brazil and others are all experiencing record sales as more low-cost electric models are targeted at local buyers

Combining analysis of historical data with projections - now extended to 2035 - the report examines key areas of interest such as the deployment of electric vehicles and charging infrastructure, battery demand, investment trends, and related policy developments in major and emerging markets.
