## Electric vehicle range st john s

2023 was the first year for the fully electric ID.4 here in Newfoundland, but the journey for getting this new electric vehicle has been in the making for quite some time. It started with the opening of our beautiful new dealership at 90 Kelsey Drive in 2019. This brought a bright and spacious showroom, multiple electric vehicle charging stations, a new service drive-thru, more ramps in our service department, and infrastructure needed to support electric vehicles.

We have a professional team of sales staff, service advisors, and technicians that are driven to give you an enjoyable customer experience and help you in your journey for an electric vehicle. Visit us at our showroom at 90 Kelsey Drive and see for yourself how we are electric vehicle ready and order your 2024 ID.4!

**Built for Canada**The ID.4 features an available heat pump to help preserve range. Its heated front seats, heated mirrors, heated steering wheel and heated windshield will ensure a safe and comfortable drive. So if you think this German-engineered electric vehicle can't handle the Canadian cold, think again.

**Range**With a range of up to 468 km for RWD and up to 423 km for AWD, the ID.4 gives you enough distance to go from St. John's to Gander or even St. John's to Clarenville and back!

**Available AWD**Whether you're cruising around or roughing it a bit, the ID.4 with available All-Wheel Drive can handle it all. It also features a second electric motor at the front wheels to intelligently distribute additional power when and where it's needed most.

**Charging**With the arrival of the fully electric ID.4 here in Newfoundland, stay charged up as you road trip across our beautiful province! Drive with peace of mind with fast chargers located every 70 kilometres across the island on the Trans Canada Highway, and more to come!

**Take a victory lap**The future of safety has arrived. The innovative thinking that shaped every detail of the ID.4, also just made it a 2022 IIHS TOP SAFETY PICK, a highly prestigious award that represents the most rigorous safety testing in the industry.

**Future Forward**There are a number of option packages for the 2024 ID.4 . With a suite of impressive, visually unparalleled features, take your ID.4 up another notch with a look that will turn heads.

**Intelligent design**The MEB platform is the modular foundation on which all our electric vehicles are built--with an emphasis on maximizing space, range, comfort, and convenience. The result is a longer wheelbase, shorter overhangs, and a roomier, more functional cabin.

**Room to spare**With fully foldable rear seats and the convenience of a crossover, the ID.4 can more than hold

## Electric vehicle range st john s

its own. From family ski trips, to camping adventures, to early morning hockey practices, the 1,818L of available cargo space can take it all on.

Instant TorqueIt's a fully electric vehicle and full of that iconic Volkswagen feeling. You'll definitely feel it the second you hit the pedal of your ID.4. While the acceleration is much quieter than a combustion engine, we can't promise you won't break the silence with a few oohs and aahs. Especially as you experience going from zero to 100 km/h in 5.3 seconds\* with available AWD.

BatteryAt the heart of the ID.4 is an 82-kWh lithium-ion battery that has a maximum charging rate of 11 kW AC or 135 kW with a DC charger. In other words, that means this battery's got impressive power and can charge up fast.
