Cabo Verde recorded the highest electricity price for households in Africa. As of September 2023, one kilowatt-hour costs around 0.31 U.S. dollars in the country. Kenya and Mali followed, with households paying 0.22 U.S. dollars per kilowatt-hour. Burkina Faso, Gabon, and Rwanda also recorded relatively higher prices for electricity on the continent. On the other hand, Angola, Libya, Ethiopia, and Sudan registered the lowest prices for electric energy in Africa.

In Africa, countries with high electricity prices for households also tend to have higher prices for businesses. For instance, Cabo Verde, Burkina Faso, and Kenya's energy prices for companies placed them among the most expensive four countries on the continent. As of late 2023, the electricity prices stood at around 0.2, 0.2, and 0.19 U.S. dollars per kilowatt-hour, respectively.

Data available only for the African countries displayed. The values have been rounded to the closest hundredth, therefore could differ from the original values rounded to the closest thousandth. The source does not specify the publication date. The release date is the date of access.

Energy consumption per capita is low, at about 0.3 toe/capita in 2022, compared to the average for

Sub-Saharan Africa (0.6 toe/capita), including 130kWh of electricity (2022).

Since 2012, primary energy consumption has increased by an average of 5%/year, reaching 7.5Mtoe in 2022. The share of biomass in primary consumption declined from 84% in 2010 to 71% in 2022, whereas the share of oil increased from 16% in 2010 to 28% in 2022.
