

Electricity market trends Italy

global energy crisis has placed electricity security and affordability high on the political agenda in many countries. The International Energy Agency's Electricity Market Report 2023 offers a deep analysis of recent policies, trends and market developments. It also provides forecasts through 2025 for electricity demand, supply and CO₂

Italy Electricity increased 44.69 EUR/MWh or 40.24% since the beginning of 2024, according to the latest spot benchmarks offered by sellers to buyers priced in megawatt hour (MWh). This page includes a chart with historical data for Italy Electricity Price.

In 2023, the net electricity production in Italy amounted to 257 terawatt-hours, of which over 55 percent was generated from fossil sources. Renewables accounted for more than a third of...

In 2022, Italy added 1.6 GW of new solar PV capacity and 0.5 GW of new wind capacity. Italy has scope to increase the share of wind power, which accounted for 11 GW (9%) of installed capacity and 7% of electricity generation in 2021. The NECP sees wind power capacity reaching 19 GW in 2030, which would require an accelerated roll-out.

The International Energy Agency's Electricity Market Report 2023 offers a deep analysis of recent policies, trends and market developments. It also provides forecasts through 2025 for electricity demand, supply and CO₂ emissions - with a detailed study of the evolving generation mix.
