

Electricity regulations seychelles

Electricity (Consumer Service) Regulations, 2024. In exercise of the powers conferred by section 47 of the Electricity Act, 2023, the Minister responsible for energy makes the following Regulations --. Part I - Preliminary Citation.

The Seychelles Legal Information Institute (SeyLII) offers free and anonymous access to case law, legislation and secondary legal materials from the Seychelles. Access to the letter of the law supports the rule of law, access to justice and economic development.

Electricity (Amendment) Regulations, 2023. In exercise of the powers conferred by Sections 17 of the Public Utilities Corporation Act, the Ministry for Agriculture, Climate Change and Environment makes the following Regulations --.

The Seychelles Legal Information Institute (SeyLII) offers free and anonymous access to case law, legislation and secondary legal materials from the Seychelles. Access to the letter of the law supports the rule of law, access to justice and economic development. SeyLII is an independent, self-funded organisation and needs your support.

SeyLII was established in 2012 under the auspices of the Judiciary of Seychelles and with the support of AfricanLII. It became an independent registered association in 2015. SeyLII is a member of the international Free Access to Law Movement and subscribes to the principles of the Declaration on Free Access to Law.

As part of the process to the review the energy legislations and regulations, the Seychelles Energy Commission organised a workshop with relevant stakeholders yesterday.

The Seychelles Energy Commission (Sec) had an introductory meeting with the consultants and relevant stakeholders as a first step, followed by a virtual workshop in March 2022. This workshop provided a more detailed presentation of the two legislations and four regulations. The two legislations are the Electricity bill and the Regulatory Bill and the four regulations are the Licence Regulations; Distributed Energy Regulations; Independent Power Producer Procurement Regulations; and Tariff Regulations.

The Bills and regulations have been reviewed by stakeholders and the workshop provided them with another opportunity to ask questions and provide further inputs before the documents are finalised. It will also be a way to learn more about the changes that will occur in the electricity sector.

The workshop was opened by Seychelles Energy Commission chief executive Tony Imaduwa and more than 20 people from different sectors attended the whole day meeting.

The Transmission and Distribution section has the responsibility of ensuring that electric power is supplied in a safe and reliable manner to meet the needs of different consumer sectors.

The Planning and Design Section is responsible for ensuring that all Service Connection Enquiries (SCE) proposals are technically feasible, cost-effective and that all electrical installations meet the BS 7671 required standard. This section also processes various forms of Planning applications including new development projects, removal of right of way, subdivision of land, water pipelines etc…

The Electricity Production Section has the responsibility of ensuring that electricity generated meets the ever-growing electricity demand of the country which is estimated at 4 to 5 % increase annually.
