

Electricity safety georgetown

Electricity safety georgetown

After 15 years as a lineman in power distribution it's time to contribute towards building a culture of Safety Excellence while training the next generation of Lineman!

Today, the Chairman of the Georgetown Chamber of Commerce and Industry's (GCCCI) Construction and HSSE Committee, Mr. Keon Howard, met with Mr. Kevon Grimmond, Chief Electrical Inspector (Ag), and other senior representatives of the Government Electrical Inspectorate (GEI). Discussions were held on how the GCCCI and the GEI can collaboratively promote electrical safety in the construction sector.

As the GCCCI's Construction and HSSE Committee furthers its agenda to promote health and safety in the local construction environment, it looks forward to partnering with the GEI on activities aimed at building awareness of electrical hazards and electrical safety best practices.

The GCCCI and the GEI also agreed to work together to ensure that members of the business community are compliant with electricity sector standards and regulations.

Georgetown University is committed to providing a safe and healthy environment for all persons associated with the University, including faculty, staff, students, visitors, and members of the Georgetown community.

The Environmental, Health and Safety (EH& S) department is primarily responsible for implementing, developing and maintaining EH& S programs and performing various periodic inspections. All department heads, faculty members, supervisors, staff and students are considered collectively responsible for maintaining full compliance with local and federal regulations and University safety policies and procedures.
