

Energy management new delhi

Energy Efficiency and Renewable Energy Management Centre, Department of Power, GNCT of Delhi was set up in 2006. This Centre is responsible for promotion of renewable energy, energy efficiency and energy conservation in the Delhi state.

Detailed information about the Indraprastha Power Generation Company Limited is provided. Users can find information on power stations, environment clearance and installed capacity of power stations etc. Details of achievements and future projects are available.

This Portal is a Mission Mode Project under the National E-Governance Plan, and is owned, designed and developed by National Informatics Centre (NIC), Ministry of Electronics & Information Technology, Government of India. The content linked through NPI is owned and maintained by the respective Ministries/Departments.

REMC Limited is incorporated on 16th August, 2013 under the companies Act 1956 (No. 1 of 1956), as a joint venture (JV) company of Ministry of Railways Limited with equity participation in the ratio of Indian Railways (49%) & RITES Limited (51%).

Solar Power is the conversion of energy from sunlight into electricity, either directly using photovoltaics (PV), indirectly using concentrated solar power, or a combination. Concentrated solar power systems use lenses or mirrors and solar tracking systems to focus a large area of sunlight into a small beam. Photovoltaic cells convert light into an electric current using the photovoltaic effect.

A wind turbine is a system which transforms the kinetic energy available in the wind into mechanical or electrical energy that can be harnessed for any required applications. Wind electric turbines generate electricity that can be utilized locally or transported to the desired location through grid substation.

Power Procurement inherently means a transaction where the price of power is negotiable and options exist about whom to trade with and for what quantum. Power can be traded through open access mechanism either bilaterally or via exchange. Bilateral contracts are negotiated between two parties, one being buyer and other the seller. On the other hand, In Exchange trading, the traders can quote their offers and bids a day ahead of physical delivery.

In order to support implementation of these sections of the Act we are developing a pilot scheme to test advanced and cost effective ways to provide information and training to energy managers as well as auditors. Furthermore, this page will provide a match making mechanism and links to participating technology providers.

Energy management new delhi

Our objective is to center all information about local and international technology, energy efficiency issues, technical references around lecture notes for auditors and managers.

This site will grow depending on response from those who are involved in implementation of the Act, benefit from it, or may offer advise, technology or information to support this cause. In case you feel you qualify as a provider for lecture notes click the lecture note link below. Whoever prefers to have this technology or consultancy services posted click the technology button to inform us. We will provide space based on an evaluation to what extent products and services will assist in the implementation of the Energy Conservation Act.

Delhi must use the Rs33.48 billion (US\$407 million) allotted to the energy sector in its budget for 2023-24 to aggressively pursue solar power targets, promote sustainable practices in various sectors and participate more in green electricity markets.

With the current rooftop installed capacity of approximately 208 megawatts (MW), Delhi needs approximately an annual capacity increase of 24% in the next three years to meet the 750MW target.
