

Energy storage for load shifting south tarawa

Energy storage for load shifting south tarawa

The South Tarawa Renewable Energy Project (STREP or the Project) will support upscaling of solar power generation in Kiribati. The Project will reduce dependence on fossil fuel imports by increasing the renewable energy (RE) percentage of electricity generation. STREP has three outputs: (i) solar photovoltaic and battery energy storage system installed; (ii) draft energy act to enable increased deployment of renewable energy developed; and (iii) institutional capacity for inclusive renewable energy project development and implementation enhanced.

All packages on goods and works have been awarded. The procurement of goods and works were undertaken in accordance with ADB's Procurement Policy (2017). Since ADB is administering cofinancing resources for ADF-financed operations, universal procurement applies.

The Asian Development Bank (ADB) is committed to achieving a prosperous, inclusive, resilient, and sustainable Asia and the Pacific, while sustaining its efforts to eradicate extreme poverty. It assists its members and partners by providing loans, technical assistance, grants, and equity investments to promote social and economic development.
