## Enphase energy antigua and barbuda

The IQ Gateway M is an integral component of the Enphase Energy System. It bridges communication between the IQ Microinverters located on the rooftop and the Enphase App for remote control and monitoring.

The IQ Gateway M communicates with the IQ Microinverters via standard AC powerlines, and the Enphase App via wireless internet. The IQ Gateway M enables homeowners to control grid management functions, monitor solar production, and monitor home energy consumption with a pair of Consumption Current Transformers (CTs) included.

IQ8P and IQ8HC Microinverters feature a peak output AC power of 480 W and 384 W, respectively. The microinverters are designed for residential applications and support higher powered solar panels up to 670 W DC. IQ8P and IQ8HC Microinverters activated in these select Caribbean countries come with a 25-year warranty from Enphase.

"The new IQ8 Microinverters take our solar installations to the next level," said Abraham Espinal, CEO of Enestar Energy?a Renewable, an installer of Enphase products in the Dominican Republic. "Their high efficiency and robust performance in our sunny climate will ensure that our customers get the most out of their solar investments for decades."

"The advanced technology of the IQ8 Microinverters makes them an invaluable asset for our installations," said Rodesonne Louis, president at Green Bahamas Co. LTD, an installer of Enphase products in the Bahamas. "The seamless integration and superior reliability give our customers confidence in their solar systems, knowing they will continue to perform efficiently for years to come."

"Our new IQ8 Microinverters provide homeowners in the Caribbean with a resilient and high-performance solution for their solar needs," said Mehran Sedigh, senior vice president of sales at Enphase Energy. "The region's unique environmental challenges require robust and reliable technology, and our IQ8 Microinverters are designed to deliver the highest quality and performance, ensuring maximum energy production and peace of mind for our customers."
