

Ev battery production by country

Data as of February 1, 2021. China is by far the leader in the battery race with nearly 80% of global Li-ion manufacturing capacity. The country also dominates other parts of the battery supply chain, including the mining and refining of battery minerals like lithium and graphite.

Production capacity of electric vehicle battery manufacturing leaders worldwide in 2023 (in megawatt-hours)
... Global critical minerals production share 2023, by majority producing country.

EV lithium-ion battery production capacity shares worldwide 2021-2025, by country. China dominated the world's electric vehicles (EV) lithium-ion (Li-ion) manufacturing market in 2021. That...

The UK had 4% of the global EV battery market, up from 3% in Q3 2022. France was then the 5th largest EV battery producer in the world, with 4.6 GWh of battery capacity produced.

Statista R identifies and awards industry leaders, top providers, and exceptional brands through exclusive rankings and top lists in collaboration with renowned media brands worldwide. For more details, visit our website.

This special report by the International Energy Agency that examines EV battery supply chains from raw materials all the way to the finished product, spanning different segments of manufacturing steps: materials, components, cells and electric vehicles. It focuses on the challenges and opportunities that arise when developing secure, resilient and sustainable supply chains for electric vehicle batteries and reviews government targets and strategies in this area. This special report serves as input to the special report on Securing Clean Energy Technology Supply Chains.
