In this article, we present to you our top picks for the best EV charger pedestals. Whether you're looking for a durable outdoor option or a sleek indoor design for your shared parking, we've got you covered. let us guide you through the best EV charger pedestals available.

The choice between a wall-mounted EVSE and a pedestal depends on factors such as space availability, cable management preferences, and the specific needs of the EV owner.

As a private home owner with two electric vehicles (EVs), installing a pedestal for your Electric Vehicle Supply Equipment (EVSE) can offer simultaneous charging for both vehicles. The pedestal can accommodate multiple charging outlets provides a practical solution for meeting the charging needs of multiple EVs at the same time.

The VIVO Outdoor EV Charging Stand is a solid and reliable option for anyone looking for a durable and weather-resistant charging pedestal for their electric vehicle. The stand is easy to install and anchors into most concrete surfaces for a secure hold. The stainless steel base is sturdy and well-made, ensuring that your charger stays safe and secure while in use.

One of the best features of the VIVO Outdoor EV Charging Stand is its all-weather protection. The self-contained baffle protects the charger against all weather conditions, making it perfect for installations without a garage or carport covering. The included magnetic waterproof cover allows for charging in all weather conditions, providing protection from snow, rain, sun, dust, and more. The magnetic end secures to your car, perfectly covering the charging port.

Another great feature of the VIVO Outdoor EV Charging Stand is its compatibility with all American Standard (AS) EV chargers. This makes it a versatile option for any EV owner, regardless of the type of charger they have. The stand is also easy to install and anchors into most concrete surfaces for a secure hold.

We found the installation process to be a breeze, and the pedestal is treated to resist corrosive elements, making it suitable for both indoor and outdoor use. The eMACROS EV Charger Pedestal is a sleek and tidy way to charge your electric vehicle, eliminating cable clutter.

However, we did find that the stand may not be the most robust, and cheap fittings can cause connections to strip out. Additionally, the pre-drilled holes may not line up with all chargers, which may require some extra drilling.

Overall, the eMACROS EV Charger Pedestal is a great option for those looking for a versatile and easy-to-use EV charger pedestal. With a complete package that includes an installation guide, expansion bolts and screws,

and a 2-year warranty, you can feel confident in your purchase.

We've been using the HJSM Pedestal-Mounted EV Charging Station for a few weeks now and have been impressed with its durability and convenience. The integral structure is not only aesthetically pleasing, but also makes the product more durable. The backplane provided with the product makes it applicable to almost 90% of charger brands, which is a great feature for those who may switch charger brands in the future.

The cold-rolled steel and electrostatic spraying process ensure long-term outdoor use, which is great for those who plan to use the charger outside. However, some users have reported that the holder for the cable seems flimsy, which may be a concern for those who plan to use the charger frequently.

One downside of this product is that it does not come with a manual, making it difficult to assemble. Additionally, the metal may arrive with chipped paint in some areas. However, overall, we highly recommend the HJSM Pedestal-Mounted EV Charging Station for its durability and convenience.
