

Ev charging station vending machine

Ev charging station vending machine

Jay Ramey grew up around very strange European cars, and instead of seeking out something reliable and comfortable for his own personal use he has been drawn to the more adventurous side of the dependability spectrum. Despite being followed around by French cars for the past decade, he has somehow been able to avoid Citroën ownership, judging them too commonplace, and is currently looking at cars from the former Czechoslovakia. Jay has been with Autoweek since 2013.

For EV charging stations, transit, parking, and other types of outdoor self-service payment facilities, our VP3300C EXT is an ideal contactless payment solution. With an extended operating temperature range, the reader is ready to be embedded in an enclosed kiosk such as an EV charger where the electric currents generate excessive heat.
